City Events Finder — Team Log

Add a row every time something breaks or confuses us; **newest at the top**. These rows become the Troubleshooting and Collaboration sections of the report.

Date	Phase	What broke or confused us	What Danielle tried	What Arsema tried	What finally worked	What we learned
Nov 2	0 Setup	After installing Homebrew, `brew` wasn't found until it was added to PATH	Ran the three "Next steps" commands Homebrew printed	Ran the three "Next steps" commands Homebrew printed	`brew --version` worked; then `brew install gh`	Installers often print follow-up steps — read the output
Nov 2	0 Setup	`git config` set my name/email but didn't log me in to GitHub	Installed GitHub CLI, ran `gh auth login`	Installed GitHub CLI, ran `gh auth login`	`gh auth status` shows logged in; push works	Git identity ≠ GitHub login; commit email must also be on the GitHub account to count
Nov 2	0 Setup	Budget alerts on an education billing account may email the billing admin (school), not us	Linked Monitoring email channels to the budget	Linked Monitoring email channels to the budget	Alerts set at 50/90/100 % of $10, monthly	Check who actually receives alerts on a shared/edu billing account
Nov 2	0 Setup	Console menu says "Budgets & caps", not "Budgets & alerts" as the assignment says	Used Budgets & caps → Alerts only	Used Budgets & caps → Alerts only	Same feature, renamed	Console names change; docs and assignments lag behind

AI use

The assignment requires citing AI help (tool, developer, date). Log it here as you go.

Date	Tool	Who	What we used it for	What it got wrong or we changed
Nov 2	Claude (Anthropic)	Danielle	Step-by-step project plan; GCP project, billing budget and GitHub setup help	Nothing yet — gcloud commands in the plan not yet tested

APA example: Anthropic. (2026, November 2). *Step-by-step plan for City Events Finder on GCP* [Generative AI chat]. Claude.
